DETAILED ACTION

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The US Patent 6,888,536 is cited to teach an input device including an integrating capacitor with a parallel switch as shown in Fig. 3B.
2. The following is an examiner's statement of reasons for allowance: None of the prior art reference, alone or in combination, teaches or fairly suggests the limitations of "a discharge switch in parallel with an integrating capacitor in said integrator to discharge the integrating capacitor, said discharge switch being enabled at a rate appropriate for the resolution of said relative position coordinates" and "a digital adder to add the last digital value of the relative position coordinates before said discharge switch is enabled, with the first digital value of the relative position coordinates after said discharge switch is disabled" as required in independent claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
